The Smartfill-4 is designed for high volume production of Argon gas filled units.

Each of its 4 filling lines is fitted with the SmartStart lance and can be used with either one or 2 hole filling options.

The touch screens enable the operator to have complete control over the gas filling process. Quick and easy to use for greater productivity.

# Smartfill-4

The **Smartfill** range is supplied with the new **\*SmartStart** filling lance, it is fitted with a on/off control button so that the operator can start the gas filling process from the lance rather having to return to the gas machine. The lance body incorporates an LED light which goes green during filling, turns red on completion and after 30 seconds will turn off. The operator can see immediately which unit is filling and which has been finished. Production efficiency is increased and errors eliminated. \* Patent Pending

**Dimensions:** H 1516mm x W 735mm x D 701mm

**Power:** 13 amp

**2 off 250mm Touch Screen controls**

**Visual & audible signals on completion of fill**

**Auto and manual calibration of sensor**

**Ability to change gas fill percentages**

**Variable overfill and dwell times**

**Unit counter**

**Flow Rate: Up to 30 litres per minute per line**

**Two hole or one hole filling options**

**Vertical filling or horizontal options**

**Alert when gas bottle empty**

**Four filling lines with SmartStart lance system**

**Fill times**

**Unit size 122cm x 61cm x 15.5mm**

**Two hole filling 62 seconds**

**One hole filling 95 seconds**

**Including gas regulator (UK only)**

**Models in the Inagas range**

**Smartfill-1 1 line Argon gas filler**

**Smartfill-2 2 line Argon gas filler**

**Smartfill-4 4 line argon gas filler**

**Multifill 1 & 2 line Argon/Krypton/Xenon**

**FirstFill 1 line Argon gas filler**
